GRACE KIPA
FULLSTACK WEB DEVELOPER

CAREER OBJECTIVES

As a Full Stack Developer with a strong passion for front-end development and a solid foundation in backend technologies, I am committed to continuously advancing my technical skill set to stay aligned with industry standards. I excel at building responsive, user-centric interfaces while also ensuring robust and scalable backend logic. I thrive in fast-paced, collaborative environments and adapt quickly to evolving tech stacks. I'm seeking a challenging role where I can combine creativity, problem-solving, and technical expertise to build seamless, high-performing web applications that deliver real value to users.

WORK EXPERIENCE

FULL STACK WEB DEVELOPER • SYNERGY WELLNESS NETWORK • JULY 2024
• AUGUST 2025

[FULL-TIME]

During my time at Synergy Wellness Network (July 2024 – August 2025), I worked as part of a dynamic IT team, designing and developing front-end websites for various clients, while also taking full ownership of a full-stack blog platform tailored for one of our clients.

Initially the sole developer in this startup environment, I thrived both independently and collaboratively, adapting quickly to evolving project requirements. This role allowed me to gain hands-on experience with machine learning/AI technologies, integrate payment gateways and external APIs, and explore no-code platforms such as FlutterFlow and Glide for rapid app development. I'm seeking a challenging opportunity where I can apply my creative thinking, problem-solving skills, and technical expertise to build impactful, user-cantered web solutions.

WEB DEVELOPER • FREELANCING • JANUARY 2024 • JULY 2024

[FULL-TIME]

After graduating, I enrolled in a full stack web development bootcamp to refine and expand my technical skills. During this period, I began freelancing full-time, working on a variety of projects for clients ranging from small businesses to personal brand websites. My work included developing responsive front-end interfaces to deliver complete, functional web solutions. This phase helped me strengthen my problem-solving skills, improve client communication, and build a deeper understanding of real-world development workflows.

INVIGILATOR • IH JOHANNESBURG • OCTOBER 2020 • APRIL 2022 [PART-TIME]

IH Johannesburg is a TELF language school for foreign nationals in South Africa learning English. My roles in this company included ensuring all students have applied for their exams, and invigilating their examinations.

JUNIOR WEB DEVELOPER • ESCAPE DYNAMICS • JUNE 2018 • JUNE 2020

During my time in the role, I have aided the senior web designers with various projects, they have allowed me to input my ideas into team projects and grow my designing skills.

SKILLS

Languages

- HTML5
- CSS3
- JavaScript (ES6+)
- C++
- SQL
- PHP

Frameworks

- ReactJS
- Node.js
- Express.js
- Bootstrap
- jQuery

Databases

- MongoDB
- PostgreSQL
- MySQL

Version Control

- Git
- GitHub

APIs

- RESTful API development and integration
- Third-party API consumption

Cloud & DevOps

- Deployment to a locally hosted Ubuntu Server

No-Code Tools (App Development)

- FlutterFlow
- Glide

Other Tools & Platforms

- VSCode
- Postman
- Figma
- WordPress
- WebFlow
